

PATNA INITIATIVE
Professional African Technical Network Advisory

Data Strategy Documentation
A Business-First Framework for Decision Intelligence

Framework Reference: The 6-Step Data Strategy Roadmap
Scope: Step Zero – Value Proposition | Step 1 – Business Model | Step 2 – KP
I & Data Mapping
Status: Working Document – March 2026

Africa's energy transition deserves African-led intelligence.
This document builds the evidence-based foundation for PATNA's data strategy.

About This Document

This document presents the first three steps of PATNA's data strategy, developed using the 6-Step Data Strategy Roadmap framework. It starts before the technology – with who PATNA is, why it exists, and what value it creates – and builds systematically toward a measurement and decision-making architecture that reflects PATNA's unique operational model.

Three steps are addressed in this document:

Step

Focus

Primary Output

Step Zero

Value Proposition

Dual VP Canvas – Organisational + Platform/Product

Step 1

Business Model Mapping

Completed Business Model Canvas (9 blocks)

Step 2

Data & KPI Mapping

Business-aligned metrics inventory by model block

Steps 3–6 (Maturity Assessment, Lifecycle Mapping, VP Mapping, and Data Vision) will be developed in subsequent documentation phases.

STEP ZERO

Value Proposition

A data strategy that does not begin with value will not survive contact with reality. Before mapping the business model or identifying KPIs, we must be clear on the fundamental question: what problem does PATNA exist to solve, and for whom?

Step Zero introduces two distinct but connected value propositions: the organisational value proposition (what PATNA as an institution offers to Africa and the world) and the product/platform value proposition (what the PATNA digital platform delivers to its specific users). Both are necessary – and both must be understood before any data initiative can be meaningfully designed.

Why Value Proposition Comes First

Most data strategies fail because they start with solutions – a dashboard, a data lake, an AI model – without first establishing what value they are creating and for whom. This step disciplines the entire strategy by naming the jobs customers hire PATNA to do, the pains they experience without PATNA, and the gains they seek to achieve through PATNA's work.

The Value Proposition Canvas approach used here distinguishes between:

- Customer Profile – who experiences the problem and what they need
- Value Map – what PATNA creates to address that experience

PATNA operates at two levels. The first is institutional – PATNA as a coordinating body serving African states, negotiators, and experts in navigating global energy transition processes. The second is product – the digital platform that operationalises PATNA's coordination function. These must be treated distinctly because they serve different immediate users, even though they share a strategic purpose.

VP-A: Organisational Value Proposition

Context

PATNA was established to address a documented gap: African countries are disproportionately affected by global climate and energy transition decisions but historically under-represented in the processes that shape them. The organisation bridges expertise, coordination, and institutional capacity to change that.

Layer 1: Customer Profile – African Policymakers, Negotiators & Technical Experts

Layer 1: Customer Reality

Jobs to Be Done

Functional: Represent their countries in complex international climate and maritime processes (IMO, UNFCCC, etc.); develop technically credible national positions; implement international frameworks at the domestic level.

Emotional: Feel equipped, credible, and confident when engaging global counterparts; not feel disadvantaged or marginalised in technical or political negotiations.

Strategic: Ensure that international policy outcomes reflect African realities, support just transitions, and do not impose disproportionate economic burdens on developing African economies.

Layer 1a: Pains

African negotiators and policymakers face structurally constrained participation:

- Limited technical capacity to engage complex climate and maritime negotiations on equal footing with well-resourced delegations.
- Fragmented institutional memory: each transition of personnel risks losing accumulated expertise and relationships.

- Absence of coordinated continental positions, weakening African bargaining power in multilateral settings.
- Evidence gaps: insufficient context-specific research to ground African positions in data rather than aspiration.
- Disconnection between academic research, policy processes, and industry implementation – siloed knowledge that does not translate into action.

Layer 1b: Gains

- Access to a network of trusted African technical peers across Academic, Policy, Industry, and Civil Society cohorts.
- Coordinated, evidence-based positions that carry weight in international negotiations.
- Institutional continuity: knowledge preserved and accessible beyond individual tenures.
- Reduced duplication of effort through shared research, briefs, and analytical tools.
- Increased confidence and credibility in international settings.

Layer 2: Value Map – What PATNA Creates

Layer 2: Value Map

Proposed Initiative: A pan-African coordination and decision-intelligence platform that enables African experts to collaborate, synthesise knowledge, and act with shared purpose on energy transition and climate governance.

Pain Relievers

- Bridges the technical capacity gap by curating expertise across cohorts and enabling peer learning.
- Creates institutional memory through a structured knowledge system that survives personnel transitions.
- Facilitates coordinated continental positions through structured deliberation across constituencies (SIDS, LDCs, oil-producing states).
- Provides access to curated, context-appropriate research grounded in African realities.

Gain Creators

- Establishes PATNA as the trusted home for African technical expertise on climate and energy – an institutional identity that strengthens over time.
- Amplifies African voices in global processes by ensuring members engage with coordinated, evidence-based positions.
- Unlocks peer-to-peer knowledge exchange that reduces duplication and raises the quality of African participation.
- Creates a reputational platform that increases access to funding, partnerships, and convening opportunities.

Integrated Organisational VP Summary

Dimension

Description

Customer

African governments, policymakers, negotiators, technical experts, civil society

Jobs to Be Done

Represent Africa credibly in global energy transition processes; develop coordinated positions; build institutional capacity

Pains

Capacity gaps; fragmented knowledge; weak coordination; evidence deficits; siloed disciplines

Gains

Trusted network; coordinated positions; institutional continuity; credibility; reduced duplication

Proposed Solution

Pan-African coordination and decision-intelligence platform

Pain Relievers

Technical capacity building; structured knowledge; coordinated deliberation; context-grounded research

Gain Creators

Institutional identity; amplified voice; peer exchange; reputational platform; funding access

Delivery Mechanism

PATNA Initiative – community platform, knowledge hub, event convening, advisory outputs

VP-B: Product/Platform Value Proposition

Context

The PATNA digital platform is a distinct product with its own users, jobs to be done, pains, and gains. While its ultimate purpose is to advance PATNA's mission, its immediate customers are the platform's direct users: community members, Secretariat staff, cohort leads, and content editors. These users have specific operational needs that must be understood independently of the broader organisational mission.

PATNA's platform serves two user groups with distinct but connected needs: internal operators (Secretariat, Cohort Leads, Editors) who manage community and content, and external participants (members, applicants, visitors) who engage through the platform.

Layer 1: Customer Profiles – Platform Users

User Group A: Community Members & Applicants

African experts, policymakers, researchers, and practitioners seeking to engage with the PATNA network, access knowledge, and contribute to energy transition and climate work.

User Group B: Secretariat, Cohort Leads & Editors

PATNA operational staff responsible for managing community onboarding, moderating discussions, publishing content, and reporting on platform performance.

Layer 1: Pains – Community Members & Applicants

- No structured pathway to join PATNA – unclear how to apply, what cohort means, what participation looks like.
- Fragmented knowledge: PATNA's outputs scattered across different formats and locations, difficult to find and use.
- No visibility into other members: cannot discover peers, identify collaborators, or find relevant expertise.
- No space for structured peer discussion connected to PATNA's thematic work.

Layer 1a: Gains – Community Members & Applicants

- Clear, credible onboarding process that validates expertise and establishes cohort identity.
- Single, organised knowledge hub where all PATNA outputs are discoverable and tagged for relevance.
- Member directory enabling peer discovery across cohorts, geographies, and expertise areas.
- Structured spaces for discussion, collaboration, and engagement tied to PATNA's work.

Layer 1b: Pains – Secretariat & Cohort Leads

- Manual and fragmented onboarding process with no structured workflow, causing inefficiency and inconsistency.
- Publishing scattered across multiple tools with no tagging, versioning, or reuse architecture.
- No visibility into community health: who is active, who is disengaged, what content resonates.

- No data foundation for reporting impact to funders or partners.

Layer 1c: Gains – Secretariat & Cohort Leads

- Structured, governed onboarding workflow (expression of interest → interview → approval → activation).
- Unified Insights publishing system with consistent tagging for theme, geography, cohort, and process.
- Real-time visibility into community engagement, content usage, and member activity.
- Credible, data-backed impact narrative for funders and institutional partners.

Layer 2: Value Map – What the Platform Creates

Layer 2: Value Map

Proposed Initiative: Community-driven decision intelligence platform: a governed, purposeful digital environment that structures PATNA's community, organises its knowledge, and establishes the data foundation for future AI-enabled decision support.

Pain Relievers

- Interview-gated, cohort-structured onboarding replaces ad-hoc engagement with a credible, governed pathway.
- Unified Insights Hub with structured tagging eliminates content fragmentation and enables discovery and reuse.
- Member directory with cohort, geography, and expertise filters makes the community visible and navigable.
- Role-based governance model clarifies responsibilities for Secretariat, Cohort Leads, and Members.
- Platform analytics provide real-time visibility into engagement, content performance, and community health.

Gain Creators

- Structured onboarding creates a trusted, credible community with clear identity and purpose.
- Organised knowledge becomes a durable institutional asset, not a transient output.
- Peer discovery accelerates collaboration, knowledge exchange, and cross-cohort connection.
- AI-ready data architecture positions PATNA for decision intelligence capabilities as the platform matures.
- Impact visibility strengthens funder confidence and opens new partnership opportunities.

Integrated Platform VP Summary

Dimension

Community Members / Applicants

Secretariat / Cohort Leads

Customer

African experts, policymakers, researchers, practitioners

PATNA Secretariat, Cohort Leads, Content Editors

Jobs to Be Done

Engage with PATNA; access knowledge; connect with peers

Manage community; publish knowledge; report impact

Pains

Unclear onboarding; fragmented knowledge; no peer visibility

Manual workflows; scattered content; no engagement data

Gains

Credible onboarding; organised knowledge; member directory; discussion spaces

Structured workflows; unified publishing; real-time analytics

Pain Relievers

Gated onboarding; Insights Hub; member directory; community spaces

Governed workflows; tagging system; role-based permissions; analytics

Gain Creators

Trusted community identity; durable knowledge asset; peer connection

Operational efficiency; AI-ready architecture; funder-ready impact data

Delivery Mechanism

PATNA Digital Platform – website, community app, Insights Hub, AI layer (Phase 2

)

Same platform with admin tools, moderation, and analytics

STEP 1 Business Model Mapping

The Business Model Canvas maps how PATNA creates, delivers, and captures value today. It is not aspirational – it reflects the current operational reality, including the tensions and constraints that a data strategy must work within. Every data initiative that follows will be traceable back to a specific block of this canvas.

Core Principle

If the business model is unclear, the data strategy will be disconnected. This canvas ensures that every metric, every data initiative, and every insight can be tied to how PATNA actually operates.

Block 1: Customer Segments

PATNA serves distinct groups with different relationships to the organisation. Understanding who pays, who uses, and who benefits is essential.

Segment

Role

Relationship to PATNA

African Governments & Ministries

Primary beneficiary and legitimacy anchor

Partners, advisees, convening participants

Policymakers & Negotiators

Direct service recipients

Active network members, event participants

Technical Experts (Academic, Industry, CSO)

Knowledge contributors and co-producers

Cohort members – Academic, Industry, Civil Society

Institutional Partners (AU, IMO, MOWCA)

Co-conveners and credibility multipliers

Strategic partnerships and collaboration

Funders & Donors

Revenue enablers

Grant-makers; programme-funders; institutional sponsors

Governments & Agencies Seeking Support

Clients for advisory and coordination services

Work With Us pipeline – governments, agencies, regional bodies

Block 2: Value Propositions

PATNA's value propositions differ by segment. The overall purpose is to strengthen Africa's agency in global energy transition and climate processes through coordination, evidence, and institutional capacity.

Segment

Value Delivered

Policymakers & Negotiators

Coordinated, evidence-based positions for international processes; trusted peer network; technical briefing and analysis

Technical Experts

Professional community with cohort identity; access to cross-disciplinary knowledge; visibility and credibility on Africa's transition agenda

Governments & State Institutions

Strategic advisory and coordination support; access to PATNA expertise across policy, academic, and industry cohorts

Funders

Credible, impact-oriented grantee; measurable outcomes; Africa-centred leadership narrative; capacity building and institutional legacy

Partners (AU, IMO, Regional Bodies)

Trusted convener and knowledge synthesiser for African perspectives in multilateral

ral processes

Block 3: Channels

PATNA reaches its audiences and delivers value through a combination of digital infrastructure, convening, and network relationships.

Channel

Type

Current State

Notes

Public Website

Digital

Functional but limited

Primary awareness; limited interactive features

Events (Summits, Workshops)

Physical/Hybrid

Active

LEAP summits; Dakar workshop; Abuja summit – high-value convening

Email & Direct Outreach

Digital

Ad-hoc

Primary engagement channel; no CRM structure

Partner Networks

Relationship

Active

AU, IMO, MOWCA, national agencies

Publications & Reports

Digital

Inconsistent

Distributed across email, website, external hosting

Social Media

Digital

Nascent

Limited systematic presence

Future: Community Platform

Digital

In development

Phase 1 MVP – structured member community and knowledge hub

Block 4: Customer Relationships

PATNA's relationships are predominantly personal and high-trust, built through face-to-face convening and expert credibility. The absence of structured digital relationship management is a current constraint.

Relationship Type

Segment

Current Mechanism

Gap

High-trust personal

Policymakers, negotiators

Events, direct communication

No systematic follow-up or engagement tracking

Cohort-based peer

Technical experts (members)

Informal network; email lists

No governed digital community space

Institutional

Partners and funders

MOUs, programme agreements

Limited digital touchpoint between events

Advisory/transactional

Governments seeking support

Work With Us – email-based
No structured pipeline or status tracking
Public awareness
General/visitors
Website, social media
Limited personalisation or return engagement

Block 5: Revenue Streams

PATNA is a non-profit organisation. Its revenue is grant and programme-based, supplemented by institutional partnerships. Financial sustainability requires diversified income streams and the ability to demonstrate measurable impact to funders.

Revenue Stream

Description

Predictability

Notes
Grant Funding
Project-specific grants from climate funds, foundations, bilateral donors
Low-Medium

Core revenue; tied to defined deliverables

Programme Funding

Multi-year institutional funding for LEAP and similar programmes
Medium

Growing; dependent on funder relationships

Institutional Partnerships

Co-funding and in-kind from partners (AU, IMO, regional bodies)
Medium

Credibility-dependent; not cash-generating

Advisory & Capacity Services

Government/agency support services via Work With Us
Low (early stage)

Emerging revenue; requires formalisation

Events & Convenings

Event-linked funding; co-hosting fees; participant contributions
Low-Medium

Project-tied; not standalone revenue

Block 6: Key Resources

PATNA's value depends on a small set of critical assets. The most important are human – the credibility, expertise, and relationships of the Secretariat and cohort network. Data and knowledge infrastructure is an emerging resource that underpins future scalability.

Resource Type

Resource

Criticality

Current State

Human
Secretariat team – coordination, partnerships, delivery

Critical

Small, high-capability team

Human

Cohort network – 4 cohorts: Academic, Policy, Industry, CSO
Critical

Active but unstructured digitally

Human

Cohort Leads – subject-matter leadership

High

Identified; roles under development

Intellectual

PATNA brand and institutional credibility

Critical
Strong in maritime/energy transition circles
Intellectual
Knowledge outputs – reports, briefs, analysis, event outputs
High
Accumulated but fragmented; not systematically tagged
Data
Member/partner data, engagement records, event records
High
Ad-hoc; no centralised system
Technology
Website, CMS, email tools
Medium
Functional; not yet platform-grade
Financial
Active grant portfolio
Critical
Healthy but project-dependent

Block 7: Key Activities

These are the recurring activities that directly produce PATNA's value. Without them, PATNA does not function. Each represents a process that data can monitor, improve, or scale.

Activity	Description	Data Dependency	Current Maturity
Event Convening	Designing and running summits, workshops, dialogues (e.g. LEAP, Dakar, Abuja)	Attendee data, outcome tracking, follow-up records	High operational; low data capture
Knowledge Production	Authoring, curating, and publishing research briefs, reports, and insights	Content taxonomy, publication workflow, version control	Active; fragmented publishing
Community Management	Onboarding, moderating, and sustaining the expert network	Member profiles, cohort records, engagement data	Manual; ad-hoc; no platform
Policy Engagement & Advisory	Technical inputs to international processes (IMO, UNFCCC); government advisory	Policy process calendar, member contributions, outcome data	Active; limited documentation
Partnerships & Funding	Maintaining funder relationships, developing proposals, reporting impact	Grant pipeline, activity logs, impact metrics	Operational; manual reporting
Content & Communications	Managing website, publications, and external communications	Web analytics, engagement data, campaign performance	Basic; no structured tracking

Block 8: Key Partnerships

PATNA's partnerships are force multipliers. They extend reach, add credibility, and open doors to funding and convening opportunities. Some are operationally critical; others are strategic.

Partner	Type	Contribution	Dependency Level
---------	------	--------------	------------------

African Union (AU)
 Institutional/Strategic
 Continental legitimacy and reach; co-convening
 High
 International Maritime Organization (IMO)
 Regulatory/Strategic
 Process access; global credibility; LEAP anchor
 High
 MOWCA / MOESNA
 Regional body
 West & East African maritime coordination
 Medium
 University partners (UCL, Nairobi, Lagos, etc.)
 Academic
 Research capacity; academic credibility; PATNA Academic Cohort pipeline
 Medium
 National agencies (NIMASA, Ghana Maritime Authority, ANAM)
 Government
 State-level engagement; implementation pathways
 Medium
 Climate/energy funders
 Financial
 Grants and programme funding
 Critical
 AGNES / AMAG
 Technical network
 Negotiator community; expertise access
 Medium
 Technology partners (platform development)
 Operational
 Platform build and maintenance capability
 Medium (growing)

Block 9: Cost Structure
 PATNA's costs are primarily people-driven (Secretariat, expertise) and activity-driven (events, programmes). Technology is currently a modest cost centre but will grow as the digital platform matures.

Cost Category	Description	Fixed/Variable	Notes
People – Secretariat	Core team salaries, coordination, leadership	Fixed	Largest cost driver; essential
People – Expert Fees	Cohort experts, advisory fees, consultants	Variable	Project-tied; grows with activity
Events & Convenings	Venue, logistics, travel, facilitation	Variable	High per-event cost; funded through programmes
Technology & Platform	Website hosting, CMS, tools; growing with platform development	Mixed	Currently low; increasing with Phase 1/2 build
Knowledge Production	Research, publications, translations	Variable	Multilingual costs increasing (EN/FR/PT/AR)

Programme Delivery
LEAP and other programme costs
Variable
Grant-funded; tied to funder timelines
Overhead & Operations
Finance, legal, communications, administration
Fixed
Lean; proportionate to team size

Business Model Canvas – Summary View

The canvas below provides a consolidated view of the nine blocks, highlighting how PATNA creates value from its current capabilities and relationships.

Key Partnerships
Key Activities
Value Propositions
Customer Relationships
Customer Segments
AU, IMO, MOWCA, University partners, National agencies, Climate funders
Event convening, Knowledge production, Community management, Policy engagement, Partnerships & funding
Coordinated African positions; institutional capacity; evidence-based decision support; trusted expert network
High-trust personal; cohort-based peer; institutional; advisory; public awareness
African governments, Policymakers, Technical experts (4 cohorts), Funders, Institutional partners

Key Resources

Channels

Secretariat team, Cohort network (4 cohorts), PATNA brand & credibility, Knowledge outputs, Grant portfolio

Events & Summits, Public Website, Email outreach, Partner networks, Community Platform (in dev)

Cost Structure

Revenue Streams

People (Secretariat + expert fees) | Events & convenings | Technology & platform | Knowledge production | Programme delivery | Overhead
Grant funding | Programme funding (LEAP) | Institutional partnerships | Advisory & capacity services | Event-linked funding

STEP 2 Data & KPI Mapping

Now that the business model is mapped, we can answer the critical question: how do we know each part is working? This step translates every block of the Business Model Canvas into specific data requirements and key performance indicators (KPIs) that inform real decisions.

The core rule of this step is that every KPI must answer a business question. If a metric does not inform a decision, it does not belong here. This discipline prevents the accumulation of vanity metrics and ensures PATNA's reporting focuses on what creates and sustains value.

Design Principle

PATNA operates as a non-profit with mission-driven value creation. Its KPIs therefore reflect both operational health (efficiency, reach, engagement) and mission impact (policy influence, knowledge uptake, African representation). Both dimensions must be tracked.

KPI Block 1: Customer Segments

Business Intent: Understand who PATNA actually serves and whether the community is growing, active, and representative.

KPI / Metric

Data Required

Owner

Frequency

Decision Supported

Active members by cohort

User activity logs; last login; engagement events

Secretariat Admin

Monthly

Community health; cohort balance assessment

Member retention rate (12-month)

Join date; last active date; churn events

Secretariat Admin

Quarterly

Platform value assessment; intervention triggers

Application conversion rate

Applications submitted vs. approved vs. active

Secretariat Admin

Monthly

Onboarding effectiveness; screening quality

Geographic representation

Country of residence in member profiles

Secretariat Admin

Quarterly

Inclusion assessment; outreach targeting

Cohort composition balance

Members per cohort (Academic/Policy/Industry/CSO)

Cohort Leads

Quarterly

Balance strategy; targeted recruitment

New member growth rate

New user accounts per period

Secretariat Admin

Monthly

Community growth tracking; recruitment ROI

Partner/institutional engagement rate

Partner interactions, event participation, content contributions

Secretariat Admin

Quarterly
Partnership value assessment

Current Data Gap

No centralised member database exists. Member records are held in email lists, spreadsheets, and informal records. A core outcome of the platform MVP must be establishing a single source of truth for member data.

KPI Block 2: Value Proposition Delivery

Business Intent: Measure whether PATNA is actually delivering the value it promises – coordinated positions, knowledge access, capacity building, and credibility in global processes.

KPI / Metric

Data Required

Owner

Frequency

Decision Supported

Knowledge content published (by type)

Content item records in Insights Hub; type classification

Content Editor

Monthly

Content strategy; resource allocation

Content downloads/views by cohort relevance

View counts; download events; cohort tag engagement

Content Editor

Monthly

Content resonance; tagging effectiveness

Policy process contributions made

Policy submission records; member participation logs

Secretariat

Per event/process

Policy engagement effectiveness

Member NPS / satisfaction score

Periodic survey; in-platform feedback mechanism

Secretariat

Bi-annual

Value perception; platform iteration priorities

Events held and participants reached

Event records; attendance logs; geographic distribution

Secretariat

Per event + quarterly

Convening impact; reach measurement

AI/Knowledge tool adoption (Phase 2)

RAG query logs; AI interaction events

Secretariat Admin

Monthly (Phase 2)

Decision intelligence usage; AI maturity readiness

KPI Block 3: Channels

Business Intent: Understand which channels actually bring people to PATNA, which convert to membership or engagement, and where the drop-offs occur.

KPI / Metric

Data Required

Owner

Frequency

Decision Supported

Website traffic by source

Google Analytics 4 – referral, organic, social, direct

Content Editor

Weekly

Channel investment decisions; SEO priorities
Application source attribution
Application form – 'How did you hear about us?' field
Secretariat Admin
Monthly
Recruitment channel effectiveness
Event registration to attendance ratio
Event registrations vs. actual attendance
Secretariat
Per event
Event communication effectiveness
Work With Us enquiry conversion
Enquiry submissions; follow-up; partnership progress
Secretariat
Monthly
Advisory pipeline management
Content engagement by channel
Social shares, email click-through, web referrals to Insights
Content Editor
Monthly
Content distribution strategy
Multilingual reach (post Phase 2)
Language preference in profiles; content views by language
Content Editor
Quarterly
Language investment prioritisation

KPI Block 4: Customer Relationships

Business Intent: Measure whether PATNA's relationships with members, partners, and funders are healthy, responsive, and deepening over time.

KPI / Metric
Data Required
Owner
Frequency
Decision Supported
Discussion thread activity per space
Thread and comment counts per community space
Cohort Leads
Weekly
Community health; space relevance assessment
Member engagement depth (lurker vs. contributor)
Login events vs. post/comment actions; engagement tier classification
Secretariat Admin
Monthly
Re-engagement strategy; community activation
Onboarding completion rate
Application → interview → approval → activation step completion
Secretariat Admin
Monthly
Onboarding process health; drop-off identification
Repeat event participation rate
Member attendance across multiple PATNA events
Secretariat
Per event series
Member loyalty; network depth
Enquiry response time (Work With Us)
Submission timestamp vs. first response timestamp
Secretariat
Continuous
Responsiveness; professionalism
Partner interaction frequency

Partner-related events, communications, collaborative outputs
Secretariat
Quarterly
Partnership health; relationship investment

KPI Block 5: Revenue Streams

Business Intent: Track financial sustainability, predict revenue shortfalls, and ensure income is diversifying over time to reduce grant dependency.

KPI / Metric
Data Required
Owner
Frequency
Decision Supported
Grant income by programme
Grant records; receipts; programme allocation
Secretariat / Finance
Monthly
Financial planning; programme sustainability
Grant pipeline coverage (next 12 months)
Active proposals; funding stage; likelihood estimates
Secretariat
Monthly
Funding security; bridge planning
Revenue by stream (grant vs. advisory vs. events)
Financial records categorised by stream
Secretariat / Finance
Quarterly
Diversification strategy; advisory growth tracking
Cost per programme outcome delivered
Programme costs vs. outputs (events, publications, participants)
Secretariat / Finance
Quarterly
Cost-efficiency; value-for-money reporting
Funder retention rate
Returning funders vs. first-time funders across grant cycles
Secretariat
Annual
Funder relationship health; dependency risk
Advisory services revenue growth
Advisory enquiries; conversion; fee income
Secretariat
Quarterly
Revenue diversification tracking

KPI Block 6: Key Resources

Business Intent: Ensure PATNA's critical assets – team, community, knowledge, and brand – are sufficient, well-utilised, and not at risk.

KPI / Metric
Data Required
Owner
Frequency
Decision Supported
Secretariat capacity utilisation
Activity logs; task tracking; self-reported workload data
Secretariat Lead
Monthly
Capacity planning; hiring decisions
Cohort lead activity rate
Cohort lead posts, moderation actions, event contributions
Secretariat Admin

Monthly
Cohort governance health; lead support needs
Knowledge asset coverage by theme
Insights Hub content tagged by theme; gap analysis
Content Editor
Quarterly
Content strategy; knowledge gap identification
Platform uptime and performance
Hosting/CMS monitoring; page load times; error rates
Tech/Admin
Continuous
Technical stability; performance investment
Brand mention and visibility
Media monitoring; citation tracking; social mention volume
Secretariat
Monthly
Awareness growth; reputation management
Skills coverage in expert network
Member profile expertise tags; cohort skills inventory
Cohort Leads
Quarterly
Recruitment targeting; cohort gap filling

KPI Block 7: Key Activities

Business Intent: Measure operational performance across PATNA's most important recurring activities – ensuring efficiency and outcome quality.

KPI / Metric
Data Required
Owner
Frequency
Decision Supported
Events held per quarter (vs. target)
Event records; planned vs. delivered
Secretariat
Quarterly
Programme delivery health
Content published per month (by type)
Insights Hub publication records
Content Editor
Monthly
Publishing cadence management
Onboarding cycle time (application to activation)
Application timestamps at each stage
Secretariat Admin
Monthly
Process efficiency; backlog management
Policy submissions / contributions made
Policy engagement log; submission records
Secretariat
Per process cycle
Policy impact measurement
Grant proposal submission rate
Proposals submitted; success rate; time-to-submission
Secretariat
Quarterly
Funding pipeline management
Website content freshness
Last-updated timestamps on pages and Insights content
Content Editor
Monthly
Content maintenance priority

KPI Block 8: Key Partnerships

Business Intent: Manage both the value and the risk of PATNA's partner network – ensuring dependencies are understood and partnerships are delivering.

KPI / Metric

Data Required

Owner

Frequency

Decision Supported

Active partner engagements (vs. target)

Partnership log; interactions per partner per period

Secretariat

Quarterly

Partnership investment decisions

Partner-enabled opportunities generated

Events, grants, or introductions attributable to partner

Secretariat

Quarterly

Partner ROI assessment

Partner contribution to content

Content items co-authored, reviewed, or endorsed by partners

Content Editor

Quarterly

Knowledge partnership health

Partner platform participation

Partner members or observers registered on community platform

Secretariat Admin

Quarterly

Digital partnership integration

Dependency risk score

Number of activities reliant on single partner; contingency plans

Secretariat

Annual

Risk management; backup planning

KPI Block 9: Cost Structure

Business Intent: Understand PATNA's cost drivers, track efficiency, and ensure costs scale responsibly relative to impact.

KPI / Metric

Data Required

Owner

Frequency

Decision Supported

Total operating cost vs. budget

Finance records; budget tracker

Secretariat / Finance

Monthly

Budget compliance; reforecast needs

Cost per event (fully loaded)

All costs attributable to a specific event

Secretariat / Finance

Per event

Event investment decisions; value-for-money

Cost per new member acquired

Recruitment costs / new members onboarded

Secretariat

Quarterly

Onboarding investment efficiency

Technology cost as % of total costs

Platform, hosting, tools spend vs. total

Secretariat / Finance
Quarterly
Tech investment trajectory; scaling readiness
Programme delivery cost ratio
Programme costs as % of total programme grant received
Secretariat / Finance
Per programme
Overhead management; funder reporting
Cost growth vs. impact growth
Total cost vs. reach, output, and policy engagement metrics
Secretariat
Annual
Strategic efficiency; scaling strategy

KPI Master Summary Table

The following table consolidates PATNA's core KPIs across all nine business mode
l blocks into a single decision-ready reference. This becomes the living metrics
inventory – a working document reviewed and updated as the platform matures.

Business Area
Primary KPI

Key Data Gaps Identified

This step makes visible the data that does not yet exist. These gaps are not failures – naming them is progress. They become the highest-priority data infrastructure investments for the platform build.

Gap
Business Model Block Affected
Root Cause
Priority
No centralised member database
Segments, Relationships
No platform; members in email lists and spreadsheets
Critical
No engagement tracking system
Relationships, Activities
No community platform; interactions are undocumented
Critical
No content tagging or taxonomy
Value Proposition, Activities
Publishing scattered; no unified system or structure
High
No application funnel tracking
Segments, Activities
Application process is email-based; no workflow system
High
No grant/pipeline CRM
Revenue Streams, Partnerships
Funding tracked manually; no pipeline visibility
High
No event outcome tracking
Activities, Value Proposition
Event outputs not systematically captured or linked to knowledge base
Medium
No partner contribution data
Partnerships
Partner engagement not logged or attributed
Medium
No cost-per-outcome data
Cost Structure
Finance records not linked to activity or impact outputs
Medium

What Success Looks Like at Step 2

When this step is complete, PATNA's leadership can point to any part of the busi

ness model and say: here is how we know if it is working, who owns that number, how often we review it, and what decision it informs. The data gaps identified above become the roadmap for the platform's data infrastructure – not aspirational features, but operational necessities.

Next Steps: Steps 3–6

This document covers Step Zero through Step 2. The remaining steps will be developed in the next documentation phase:

Step

Focus

Key Output

Step 3

Data Maturity Assessment

Honest baseline of PATNA's current data capability by pillar – people, process, technology, governance

Step 4

Data Lifecycle Mapping

End-to-end mapping of how data flows through PATNA's key activities – and where it breaks down

Step 5

Value Proposition Mapping (for Data Initiatives)

Which specific data initiatives are worth building, grounded in user need and business model alignment

Step 6

Data Vision

A bounded, actionable data vision statement: where PATNA is heading and what it will not chase

PATNA Initiative – Data Strategy Documentation

Step Zero – Value Proposition | Step 1 – Business Model | Step 2 – KPI & Data Mapping

Working Document | March 2026 | Professional African Technical Network Advisory Initiative
