

Coordination. Knowledge. Action.

The PATNA Initiative convenes Africa's leading technical experts in climate and energy — equipping African states with the coordination, knowledge, and decision intelligence they need to shape global outcomes.

Est. Maritime Decarbonisation → Inclusive Energy Transition

Pan-African · Non-Profit · Liberia

WHY THE PATNA INITIATIVE MATTERS

Africa bears the highest stakes in global climate and energy decisions — yet has historically had the least influence over them. The PATNA Initiative exists to close that gap: through structured community, accumulated knowledge, and intelligent decision support, built and governed by Africans.

THREE PILLARS OF IMPACT

■ COMMUNITY

A governed network of African technical experts

Structured across four expert cohorts — Academic, Policy, Industry, and Civil Society — The PATNA Initiative convenes the professionals shaping Africa's energy future, with verified membership and moderated engagement.

■ KNOWLEDGE

A living knowledge base for African-centred decisions

Every report, brief, event output, and discussion thread is indexed and searchable — not siloed in email chains or static PDFs. The platform transforms accumulated expertise into reusable, decision-ready intelligence.

■ DECISION INTELLIGENCE

Intelligent sense-making,
African-governed

PATNA Assistant draws on the community's full knowledge base — discussions, insights, events — to answer questions and surface connections. Role-aware. Transparent about its limits. Grounded only in PATNA-approved content.

DOCUMENTED REACH & ACTIVITY

25+

African IMO member states

Engaged through the Dakar Maritime Decarbonisation Workshop, August 2025

100+

Delegates convened

One of Africa's most inclusive technical workshops on maritime decarbonisation — at a single gathering

2

LEAP flagship programmes

Phase I (2023) and Phase II: building Africa's capacity to shape net-zero shipping rules

THE PLATFORM

A purpose-built coordination and knowledge system — not a generic community tool. Designed around The PATNA Initiative's actual governance structure and decision workflows.

Personalised Dashboard Members see live cohort activity, unread threads, and outstanding responsibilities — nothing missed, no noise.	Member Directory Filter by cohort, country, expertise, or topic. Every profile shows shared spaces and — where permitted — a direct line of contact.
Community Spaces Cohorts, thematic constituencies (SIDS, LDCs, oil-producing states), and working groups, each with moderated discussion threads.	Unified Events Calendar Internal calls, PATNA workshops, and international processes like IMO sessions in one filtered view — with RSVPs and attendee visibility.

Knowledge & Insights Hub

Reports, briefs, articles, and event outputs merged into a single tagged system — discoverable by cohort, theme, geography, and process.

PATNA Assistant

Ask anything across the platform's knowledge base. Role-aware, source-transparent, and grounded only in PATNA-approved content.

WHAT THE PLATFORM TRACKS FOR FUNDERS

The PATNA platform generates live, auditable signals across each impact category — enabling the Secretariat to report with evidence, not estimation.

COMMUNITY HEALTH

- Active members by cohort
- Onboarding conversion rate
- Space participation rate
- Cross-cohort collaboration

KNOWLEDGE GENERATION

- Insights published by type
- Event outputs indexed
- Knowledge access frequency
- Content tagged by theme/geo

COORDINATION EFFICIENCY

- Discussion threads opened
- Pending actions resolved
- Events created vs attended
- Working group activity

DECISION REACH

- PATNA Assistant queries
- Expert connections made
- Countries represented
- Processes engaged
